CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

I received the return error THE MSTR PTR REC RQSTD NOT ON FILE, although the pointer parameters appear to match the values depicted in test K5 for the P3 driver. Can you help find the problem?

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

I inadvertently sent a UA instead of the UD. Which is resulting in receiving an NA. Is it appropriate for me to just delete the pointer or is there anything further necessary to resolve the possible duplicate?

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

That's correct Gary.

You just need to swap Driver Licenses.

Thanks,
Asma

Just to be sure I understand this. Since the duplicate is 7685505, the next UG request should be exactly the same to effectively agree upon the same duplicate. Is that correct?

Gary,

Yes, the 1st UG (for DLN '7685503) looks good :

	1707281006230004	37	CD	AI	XX
	1707281006230001	37	UG	XX	AI

Can you send the other UG message (for DLN '7685505') to complete the Mark Unique.

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

IN sent and messages received.

Unfortunately this will need to be the last test of the day. I have meetings and other obligations, but am pleased with the progress we've made today.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Asma, I have other obligations for the project today as well as fixes I need to make for this and other test cases. Can we pick this up tomorrow?

Hopefully we can then make progress on Driver I, K and L scenarios.

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Ah, ok. I copy/pasted the last name from the K1 instruction instead of the set up. I sent IN again and still receiving the RD with no match.

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAIAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,
Asma

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Gary,

This is the only exception to the rule of RealID=2. We would use doc type=8 and RealID=8 whenever the following occurs:

- Citation is added to a shell record (no credentials have ever been issued)
- Citation has a the CDL indicator of "Y".

GM Gary,

We had a similar Driver Stream when we did the Structured Testing and Alaska was able to add the pointer with Real ID Conformant and State Doc Type as '8' and '8'.

May be we can wait for Mina and come back to Driver J.

Thanks,
Asma

Document ID: 0.7.1187.102274 DMV00046212

Hi Asma

For test J3, I am providing the capability to create a pointer with doc type of no document (8). The test also identifies real ID conformant = 8 for the pointer. In general, the AK system is preventing anything other than 2 for the Real ID Conformant when managing AK pointers; hence, it is not persisted. Is it necessary to provide this level of flexibility or can we use Real ID Conformant = 2?

Thanks
Gary

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

	ID	App	Type	Dest	M0	T0	Err	Locator

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

I need 10 mints, to see the H7 issue.

Will let you know when to retry the UD message.

Thanks,
Asma

Sent: Thursday, July 27, 2017 11:38 AM
To: Syeda, Asma <ASyeda@aamva.org>
Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

Gary,

I see that H1, H2 and H3 were with “INVALID SYSTEM RELEASE CODE “ error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

	ID	App	Type	Dest	M0	T0	Err	Locator

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

This email comes from an external source, so remember, Think Before You Click!
Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

This email comes from an external source, so remember, Think Before You Click!
Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

That's correct Gary.

You just need to swap Driver Licenses.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Just to be sure I understand this. Since the duplicate is 7685505, the next UG request should be exactly the same to effectively agree upon the same duplicate. Is that correct?

Gary,

Yes, the 1st UG (for DLN '7685503) looks good :

	1707281006230004	37	CD	AI	XX
	1707281006230001	37	UG	XX	AI

Can you send the other UG message (for DLN '7685505') to complete the Mark Unique.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Gary,

Let me know when you ready to begin with the testing.

Thanks,
Asma

IN sent and messages received.

Unfortunately this will need to be the last test of the day. I have meetings and other obligations, but am pleased with the progress we've made today.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

Yes, the 1st UG (for DLN '7685503) looks good :

	1707281006230004	37	CD	AI	XX
	1707281006230001	37	UG	XX	AI

Can you send the other UG message (for DLN '7685505') to complete the Mark Unique.

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Asma, I have other obligations for the project today as well as fixes I need to make for this and other test cases. Can we pick this up tomorrow?

Hopefully we can then make progress on Driver I, K and L scenarios.

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAIAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,
Asma

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Gary,

Sure, this should be fine.

Can I send # K9?

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Friday, July 28, 2017 11:39 AM
To: Syeda, Asma <ASyeda@aamva.org>
Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAIAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,
Asma

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Can I send # K9?

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Friday, July 28, 2017 11:39 AM
To: Syeda, Asma <ASyeda@aamva.org>

Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use Only

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use Only

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Gary,

I need 10 mints, to see the H7 issue.

Will let you know when to retry the UD message.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Thursday, July 27, 2017 11:38 AM
To: Syeda, Asma <ASyeda@aamva.org>
Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors `NO MATCHING CONVICTION ID CODE IN H3 MESSAGE` and `REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP` although I would have to examine H7/H3/H5 to see exactly what was amiss.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Sure Gary,

Also, # K10 looks good.

The pending Test Case is # K5, where UD message was sent in error instead of H7.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use Only

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Sure Gary,

Also, # K10 looks good.

The pending Test Case is # K5, where UD message was sent in error instead of H7.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Sure Gary,

Also, # K10 looks good.

The pending Test Case is # K5, where UD message was sent in error instead of H7.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Subject: CSTIMS Webinar Invitation

Hello,

We are having a CSTIMS webinar on August 9th, 2017 2:00 PM ET. The webinar will cover the changes in the User Maintenance functionality in CSTIMS application. The changes are due to security concern raised by few Jurisdiction, to allow the user activation at a later time and to allow the password reset functionality for email based user accounts. The changes will be deployed to Training environment on August 10th and then deployed to Production environment after a week.

The primary audience for this webinar will be any CSTIMS user responsible for creating/editing user accounts, activating user accounts and resetting the passwords.

Please click the below link to register for the webinar. You can forward this invite to anyone you think should be part of this webinar. I will suggest to limit the total number of people registering for the webinar to 10 -15 from your Jurisdiction.
https://attendee.gotowebinar.com/register/7206689974865257986

After registering, the attendee will receive a confirmation email containing information about joining the webinar.

Please contact Vikas Jain at vjain@aamva.org for any questions.

Brought to you by GoToWebinar®
Webinars Made Easy®

Regards,

Dear Chief Administrators:

As you may have noticed in the Legislative Alert earlier this week, AAMVA has been collaborating with the National Governors Association (NGA), the National Conference of State Legislatures (NCSL), the American Association of State and Highway Transportation Officials (AASHTO) and the Governors Highway Safety Association (GHSA) to educate Congressional staff on a potential path forward for the testing and deployment of autonomous vehicles. While the collective group had been making headway with the House Energy and Commerce Committee on their revised draft language regarding preemption (outlined in Section 2), **recent lobbying efforts by certain industry groups have stalled bipartisan negotiations toward language limiting the extent of that preemption and preserving the operational safety oversight authorities of the states.**

AAMVA has advised the Committee on the need to separate and clarify the vehicle design safety process attributed to the federal government from the operational safety oversight needs of the states. However the Committee has not been able to accommodate language limiting the scope of preemption and has retained language that leaves a state's authority over the operational safety of vehicles unclear. Some members of the Committee have recommended an increased voice in sharing state concerns. We continue to follow the lead of NGA and wanted to alert you in the event you are **consulting with your Governor's office on this matter. You may want to ensure that they are aware of the issue as it could raise state preemption concerns**.

As described in the alert, the draft language states that *"No state or political subdivision of a State may adopt, maintain, enforce, impose, or continue in effect any law, rule, regulation, duty, requirement, standard, or other provision having the force and effect of law related to the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles or automated driving system equipment unless such law, rule, regulation, duty, requirement, standard or other provision having the force and effect of law is identical to a standard prescribed under this chapter."* This language would preclude a state from regulating the vehicle safety components of a motor vehicle. At issue is how this language affects regulation of the operational driving task, and whether states are precluded from regulating the operational safety of the vehicles in general.

Subsequent Section 3 intends to preserve state authority, but may actually confuse rather than clarify a state's role. It states, *"(3) Rule of Construction – Nothing in this subsection may be construed to prohibit a State from prescribing a law or regulation regarding any registration, licensing, liability, driving education and training, insurance, safety inspections, or traffic law or regulation unless the law or regulation is an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems, or communications systems of highly automated vehicles."* This language could be considered at odds with the preemptive language

Document ID: 0.7.1187.25909-000002 DMV00046642

as to what constitutes “an unreasonable restriction on the design, construction, mechanical systems, hardware and software systems” given that these components of the vehicle will be responsible for navigating the entire dynamic driving task.

AAMVA’s earlier alert can be found here. If we can be of any further assistance, please contact Ian Grossman or Cian Cashin at igrossman@aamva.org or ccashin@aamva.org.

Region IV Chief Administrator Call
July 25, 2017

Discussion Highlights

Participants: Sarah Garcia (MT); Esmeralda Falat (CA); Mike Dixon (CO); Tom Foster (WA); Terri Albertson (NV); Pat Kohler (WA); Tom McClellan (OR); Chris Caras (UT); Lito Vila (HI), Alberto Gonzales (ID); Jean Shiomoto (CA); Monte Roberts (UT); Taylor Rosetti (WY); Ian Grossman, AAMVA; Julie Knittle, AAMVA

Sarah Garcia, Region 4 President update - Sarah Garcia provided an overview of the Board call to discuss vacancies. The Board voted and Tom McClellan has agreed to fill Pat Kohler's vacated board position as Member At Large on the International Board. Chief Batiste will be the LE representative on the International Board. Region 4 Board vacancies: The Board approved and Chief Falat has accepted the regional LE board position to fill behind Col. Powell who retired.

Selections for the Region 4 conference committees have been made as follows:
Noemi O'Dell (HI) will be the new vice chair of the drivers committee
Sarah Werner (CO) will be the new vice chair of the PACE committee

The board approved the region bylaws to go to the international board for consideration and adoption. Reminder of the Chief Administrator Meeting to be held in September (see info below). Please send suggested meeting topics to Julie Knittle.

Chief Administrators Meeting
DoubleTree by Hilton
Tempe, Arizona
Fly in: 9/26 in the morning. Meeting begins at 1:00pm
Fly out: 9/28 in afternoon or early evening. Meeting ends at 12:00pm

Jean Shiomoto, AAMVA Board President – Attended the Region 1 conference last week. Good presentations and participation. Topics included autonomous vehicles and TNC as examples. Jean has concluded her visit to all the states and is now focused on the Annual International Conference. She brought to everyone's attention the message from Anne Ferro regarding autonomous vehicles and preemption (see attached). Steve Yonkers, DHS will be in attendance at AIC for those that have questions on Real ID. Recommend that DHS provide information about extensions in the session about milestones.

Ian Grossman, AAMVA Update- Ian checked to ensure everyone aware of activities on Capitol Hill regarding the preemption discussion. AAMVA has been working with many organizations to form a large coalition. States should ensure their Gov. is aware of the conversations. Pat asked for examples of why states don't want to give up rights and the relation to safety. States want to ensure their state laws are protected as it relates to operating vehicles.

Ian shared the recent communication increasing travel assistance for this year's attendance to AIC. The amount has been increased from $4,500 to $6,000 in recognition of the expense level needed for this year's conference. We know that some members have had challenges reserving rooms at the conference rate, which will require paying a higher room rate. Hopefully, the additional funding will support members' paying these increased costs.

Montana – Real ID a hot topic currently. Approaching a budget crisis for the state.
Experiencing significant fires in Montana.

Colorado – Doing legislative implementation that included significant law changes. MV rollout 2 complete in Aug 2018 underway. 64 counties part of the implementation which adds complexity. Counties have provided staff to the system team which is working well. Colorado has experienced outages in the offices (USPVS and SAVE part of it originally while they were upgrading the platform but better since July) with the network and connectivity to their card vendor. Focus is on strategy moving forward. New Executive Director, Michael Hartman in Colorado. FMr. Hartman is from private industry and looking forward to his arrival and meeting him. Colorado is now part of the Gemalto mDL pilot along with Idaho, Maryland and DC. Good feedback from the participating vendors in the community including liquor stores and grocery outlets so far.

California – Jean is now getting ready for AIC and welcomes everyone to San Francisco. Don't forget to register and bring a charity auction item(s). The auction proceeds go to the California Association of Highway Patrol Widows and Orphans' Trust Fund. Donation form is attached.

Oregon – July 3 went live with the new Gender X designation and has issued to 60 customers so far with lots of interest. Real ID passed July 7th. Oregon now has extension until October 2017. Newly passed bill calls for compliance until 2020. Additionally, a major transportation funding package approved with significant changes to include mpg tiers with rating of vehicles and registration fees. Signed contract with FAST for the new vehicles system. Approximately 18 months to implement. Term as Treasurer is winding down and Rick Holcolm will be taking over. Thank you Tom for your service to the board.

Nevada – moving forward with system mod efforts. Losing IFTA vendor as well as other states. Focusing on legislative session that includes autonomous vehicles as a key topic.

Hawaii – The national parks plate will be issued august 1. Some programming issues along the way under the legacy system but now launching. Legislature passed registration of autocycles in 2018. Will need to register and looking for info if other states have autocycles.

Washington: TSA is not honoring the Washington Real ID extension granted. Additionally, there are old signs in some airports. Will implement DL in fall of 2018 with implementation of the new system.

Wyoming – Legislature passed fee increases for DL and MV side. Added autocycle to definition of vehicles instead of MC. Working with legislature to determine funding methodology to fund system modernization. Will be joining the Gemalto digital DL pilot.

Idaho – Alan Frew retired in July. Alberto Gonzalez is the new Administrator for Idaho. Recently experienced system outages resulting in media attention.

Rolling out Real ID in January 2018. Timed with moving off the main frame system to the new system concurrently. Media education and campaign in December. Included 1600 in the usability group to determine the most effective media messaging.

Restructure underway of the agency. Idaho also losing the IRP vendor that is no longer in business so they are quickly looking for a new vendor. Starting procurement for overweight system. Looking forward to the AIC meeting and the Chief Administrator meeting.

Action: Alberto send to Julie for distribution the Real ID media usability results and efforts

Next Call – October 17, 2017 at 12:30pm PST

Problem: Alaska's Monthly Timeliness and Data Accuracy For CDLIS Messages Review
Problem Number: 890

Status:	Analysis	**Date:**	07/28/2017
Time:	13:25:35	**Creation Date:**	07/31/2015
Creation Time:	11:27:54	**Created By:**	JShifflett

This is a Master Problem with Subtasks.

Progress:
Entered on 07/28/2017 at 13:25:35 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by August 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **June** data, AAMVA noticed the following issues:

Document ID: 0.7.1187.25908 DMV00046648

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Convictions (HA) transactions (2 out of 4) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 78.95% error rate (15 out of 19) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (7 out of 7) Withdrawal (HW) messages

CDLIS Data Quality of Pointer Deletions

- Alaska had a 23.61% error rate (17 out of 72) Delete Driver (UE) messages

Please find the June monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 06 June CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal or Pointer Deletion messages.

Thanks,

Jessie Rogers|Senior Operations Analyst|AAMVA|4401 Wilson Blvd., Suite 700 Arlington, Va. 22203|703.908.8264|jrogers@aamva.org|www.aamva.org

Entered on 04/27/2017 at 09:18:30 EDT (GMT-0400) by Jessie Rogers:

Good morning,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **March** data, AAMVA noticed the following issues:

CDLIS Data Quality of Convictions

- Alaska had a 100% error rate (1 out of 1) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 26.09% overall error rate (24 out of 92) Updates to MPR Personally Identifiable Information

CDLIS Data Quality Updates to MPR SOR

- Alaska had a 23% overall error rate (115 out of 500) for Updates to MPR SOR

CDLIS Data Quality of Pointer Deletions

- Alaska had a 87.50% error rate (14 out of 16) Delete Driver (UE) messages

Please find the March monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 03 March CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Convictions, Withdrawals, Updates, or Pointer Deletion messages.

Thanks,

Jessie Rogers|Senior Operations Analyst|AAMVA|4401 Wilson Blvd., Suite 700 Arlington, Va. 22203|703.908.8264|jrogers@aamva.org|www.aamva.org

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by April 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist

the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **February** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 44.44% of its successful Report Out-of-State Convictions (HA) transactions (4 out of 9) within the federal time limit of 10 days

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 18.75% error rate (3 out of 16) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 25% error rate (1 out of 4) Withdrawal (HW) messages

Please find the February monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 02 February CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

Jessie Rogers│Reporting Analyst│AAMVA│4401 Wilson Blvd., Suite 700 Arlington, Va. 22203│703.908.8264│jrogers@aamva.org│www.aamva.org

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE**: All courses are ***free*** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: http://aamva.intevista.com. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers| Reporting Analyst| AAMVA| 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203| 703.908.8264| jrogers@aamva.org| www.aamva.org

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Entered on 07/28/2017 at 13:25:35 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by August 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **June** data, AAMVA noticed the following issues:

Document ID: 0.7.1187.25907 DMV00046675

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Convictions (HA) transactions (2 out of 4) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 78.95% error rate (15 out of 19) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (7 out of 7) Withdrawal (HW) messages

CDLIS Data Quality of Pointer Deletions

- Alaska had a 23.61% error rate (17 out of 72) Delete Driver (UE) messages

Please find the June monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 06 June CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal or Pointer Deletion messages.

Entered on 05/31/2017 at 12:36:06 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 33.33% of its successful Report Out-of-State Convictions (HA) transactions (1 out of 3) within the federal time limit of 10 days

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (5 out of 5) Withdrawal (HW) messages

CDLIS Data Quality Updates to MPR Personally Identifiable Information

- Alaska had a 24.32% overall error rate (9 out of 37) Updates to MPR Personally Identifiable Information

CDLIS Data Quality of Pointer Deletions

- Alaska had a 62.96% error rate (17 out of 27) Delete Driver (UE) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal, Updates to MPR PII or Pointer Deletion messages.

Thanks,

Jessie Rogers|Senior Operations Analyst|AAMVA|4401 Wilson Blvd., Suite 700 Arlington, Va. 22203|703.908.8264|jrogers@aamva.org|www.aamva.org

Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by June 8th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **April** data, AAMVA noticed the following issues:

CDLIS Data Quality of Convictions

- Alaska had a 14.29% error rate (2 out of 14) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (1 out of 1) Withdrawal (HW) messages

Please find the April monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 04 April CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction or Withdrawal messages.

Thanks,

Jessie Rogers│Reporting Analyst│AAMVA│4401 Wilson Blvd., Suite 700 Arlington, Va. 22203│703.908.8264│jrogers@aamva.org│www.aamva.org

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE**: All courses are ***free*** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: http://aamva.intevista.com. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers| Reporting Analyst| AAMVA| 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203| 703.908.8264| jrogers@aamva.org| www.aamva.org

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Progress:
Entered on 07/28/2017 at 13:25:35 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by August 11th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **June** data, AAMVA noticed the following issues:

Document ID: 0.7.1187.98941 DMV00046702

CDLIS Timeliness of Convictions Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Convictions (HA) transactions (2 out of 4) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 78.95% error rate (15 out of 19) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 100% error rate (7 out of 7) Withdrawal (HW) messages

CDLIS Data Quality of Pointer Deletions

- Alaska had a 23.61% error rate (17 out of 72) Delete Driver (UE) messages

Please find the June monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 06 June CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Conviction, Withdrawal or Pointer Deletion messages.

Thanks,

Entered on 06/28/2017 at 14:33:58 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by July 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **May** data, AAMVA noticed the following issues:

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 50% of its successful Report Out-of-State Withdrawals (HW) transactions (1 out of 2) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 100% error rate (2 out of 2) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 66.67% error rate (6 out of 9) Withdrawal (HW) messages

CDLIS Data Quality of Pointer Deletions

- Alaska had a 43.48% error rate (10 out of 23) Delete Driver (UE) messages

Please find the May monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2017 05 May CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Withdrawal, Conviction or Pointer Deletion messages.

Thanks,

Jessie Rogers|Senior Operations Analyst|AAMVA|4401 Wilson Blvd., Suite 700 Arlington, Va. 22203|703.908.8264|jrogers@aamva.org|www.aamva.org

Entered on 06/27/2016 at 16:30:34 EDT (GMT-0400) by Jessie Rogers:

Good afternoon,

According to MAP-21, States are required to resolve all CDL compliance findings by September 30, 2015, and to provide assurances that the State will remain in compliance through the next fiscal year ending in September 2016. Now that September 30, 2015 has passed, it becomes even more important for your SDLA to understand and resolve persistent CDLIS problems that could lead to compliance findings. AAMVA and FMCSA developed this report to assist your SDLA in identifying and resolving potential CDLIS problems before they become compliance findings.

Your SDLA is expected to reply to this message by July 14th with an analysis of the issues noted and a plan to address them. The response from the SDLA is helpful to gain a better understanding of how AAMVA can assist the SDLA in correcting these specific CDLIS issues. Please note that this is not a compliance report, but a tool to help States be more proactive in fixing their issues.

This problem ticket and sub-tickets for each tab in red will remain open until your State fixes the problems being reported (state remains green for three consecutive months).

In our review for the **May** data, AAMVA noticed the following issues:

CDLIS Timeliness of Withdrawals Sent Successfully

- Alaska sent 0% of its successful Report Out-of-State Withdrawals (HW) transactions (0 out of 1) within the federal time limit of 10 days

CDLIS Data Quality of Convictions

- Alaska had a 20% error rate (5 out of 1) Conviction (HA) messages

CDLIS Data Quality of Withdrawals

- Alaska had a 33.33% error rate (3 out of 1) Withdrawal (HW) messages

Please find the May monthly CDLIS Timeliness, Data Quality, and Capabilities report attached:

- 2016 05 May CDLIS Timeliness and Accuracy- Summary Workbook

If you need additional information, please let us know. For example, we can send you more detailed information on the Withdrawal or Conviction messages.

Thanks,

Jessie Rogers│Reporting Analyst│AAMVA│4401 Wilson Blvd., Suite 700 Arlington, Va. 22203│703.908.8264│jrogers@aamva.org│www.aamva.org

Good morning,

Thank you for your response on these errors. AAMVA recommends that AK continue working with the courts to let them know how important it is to report the convictions within the required time and with the correct information.

For the data quality issues, hopefully we see AK become green due to the changes in staff refining error correction processes to reduce unnecessary correction attempts. AAMVA also recommends the AAMVA Systems Training which aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations. **NOTE**: All courses are ***free*** for AAMVA members. Click the following link to view the course catalogue and to register or enroll in a session: http://aamva.intevista.com. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

We will monitor this tab and the others to see if AK improves. Once Alaska is green for three consecutive months in each tab, we will close that sub ticket for the tab.

Thanks,

Jessie Rogers| Reporting Analyst| AAMVA| 4401 Wilson Blvd., Suite 700 Arlington, Va. 22203| 703.908.8264| jrogers@aamva.org| www.aamva.org

Entered on 10/15/2015 at 13:16:39 EDT (GMT-0400) by Nichole Tham:
Good afternoon,

Thank you for this notification. Both DMV and FMCSA are aware of the issues noted in the report and DMV is actively working to resolve them. Some factors contributing to the Timeliness/Quality Errors:

The Timeliness Errors are due to staff diligently working the backlog of E-Dispo records that were not reported to DMV by the courts. These will continue to be high until that backlog is caught up. Part of this delay is attributed to the lack of distinction between CDL/non-CDL citations; additional steps are required to identify and manually update CDL citations/pointers in CDLIS, which significantly slows the process. Although DMV has expressed the need for the Department of Public Safety (DPS) to add a "CDL Indicator" to citation forms, both DPS and the Alaska Court System (ACS) has deemed it impracticable. Staff must continue to manually decipher each out of state license record to see if it is a CDL.

The Quality Errors are in part because there has been a large learning curve for staff, and because AAMVA reports multiple attempts to submit the same record as separate errors, which skews the percentages. Staff are refining error correction processes to reduce unnecessary correction attempts which should reduce error compounding overall.

Sincerely,

Nichole Tham

Hi Mina,

I believe you can now set up structured testing for SSOLV for app ID 17. We will share the test case with you by tomorrow?

Thanks,
Fatima

Subject: ~~AL~~ AK SSOLV testing

Hi Gary,

This is Fatima form AAMVA verification systems QA team. We came to know that ~~AL~~ AK is going through system rewrite. The alternate gap code ~~AL~~ AK will be using is ~~AI~~ AK. Please confirm.

Please be informed that there is a SSOLV test environment. I am in a process of authorizing ~~AL~~ AK to NCS and UNI for accessing SSOLV form the new gap code AI.

We will reach out to SSA and have them authorize AI in their test env so that ~~AL~~ AK can send SSOLV message all the way to SSA even with the alternate gap code. If anything changes, I will keep you posted.

Once the setup is all completed, my colleague Nadeem will assist you in testing as per your convenient. He will share with you the test plan as well.

Please let us know of any question.

Thanks,
Fatima Farzana

Asma

We'll need to pick up testing again Monday morning. I anticipate having most if not all outstanding bugs resolved.

For planning purposes I will be involved in other activities on Wednesday next week, but otherwise expect to be available during our normal test window.

Have a good weekend!
Gary

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

	ID	App	Type	Dest	M0	T0	Err	Locator

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,
Asma

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use Only

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAIAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,
Asma

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Asma

We'll need to pick up testing again Monday morning. I anticipate having most if not all outstanding bugs resolved.

For planning purposes I will be involved in other activities on Wednesday next week, but otherwise expect to be available during our normal test window.

Have a good weekend!
Gary

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Asma, I have other obligations for the project today as well as fixes I need to make for this and other test cases. Can we pick this up tomorrow?

Hopefully we can then make progress on Driver I, K and L scenarios.

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9 AAMVA - Official Use Only

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

or

- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

or

- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

or

- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,
Asma

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Subject: Accidents and Near-Misses During Non-Commercial Licensing On Road Skills Test

The State of Ohio has recently identified a risk to their Driver Examiners – accidents that occur during the on-road skills test for first time drivers. To address this issue, the Children's Hospital of Philadelphia (CHOP) recently partnered with Ohio Bureau of Motor Vehicles (BMV) to launch a simulator-based driving skills test that occurs before a license applicant does the on-road exam. This will eventually be used to screen for unprepared applicants that would fail the on road exam and/or put driving examiner (and others) at risk.

In order to continue to advance road safety, CHOP would like to quantify, if possible, accidents that occur during the non-commercial skills test. To do so, the CHOP team created a quick survey to make it easy to collect your answers. Here is a link to their survey: https://goo.gl/forms/D41RXJpo7BkZHaaU2

Document ID: 0.7.1187.98945 DMV00046793

On behalf of The Children's Hospital of Philadelphia's Center for Injury Research and Prevention (CHOP) and Diagnostic Driving, Inc., we would greatly appreciate your completion of this short survey to guide improving the safety of Driving Examiners. Please make every attempt to complete the survey no later than Friday, August 11, 2017.

More on CHOP's Center for Injury Research and Prevention: https://injury.research.chop.edu
More on Diagnostic Driving, Inc: www.diagnosticdriving.com

The story at the link below talks about this issue in the UK.

Register Now And Save! 2017 Annual International Conference

The 2017 Annual International Conference is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the program-at-a-glance and register online today!

Session Highlight: Autonomous Vehicles Innovation

Tuesday, August 22

Speaker: Chris Urmson, CEO, Aurora Innovation
The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to deploy fully autonomous vehicles.

Visit the Annual International Conference Web site for more program details and to register online.

Georgia Might Ditch License Plate Tags; State Studies Idea

It is one of the most common experiences among car owners across the nation: Once a year, for a required fee, receive a decal to stick on your license plate or window showing your vehicle registration is up-to-date. But now Georgia is flirting with the idea of eliminating the stickers altogether, a potential massive decision given that the decals got stuck on more than 10.7 million vehicles in the last fiscal year alone. TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

Register Now And Save! 2017 Annual International Conference

The 2017 Annual International Conference is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the program-at-a-glance and register online today!

Session Highlight: Autonomous Vehicles Innovation

Tuesday, August 22

Speaker: Chris Urmson, CEO, Aurora Innovation
The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to deploy fully autonomous vehicles.

Visit the Annual International Conference Web site for more program details and to register online.

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

After Just 2 Days, There's Already A Petition To Change Washington's Distracted Driving Law

An online petition asking state lawmakers to change Washington's new distracted driving law had more than 18,000 signatures as of Tuesday afternoon. The law went into effect on Sunday and bans the use of handheld devices, including cellphones and tablets, while driving. The law also says police can give drivers a $99 ticket for other distracting behavior — such as eating, drinking or grooming — if the driver is pulled over for another offense. GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. Read the press release for more details.

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

DMV Investigators Seeing Spike In Car Sellers Not Giving Buyers Titles (North Carolina)

More car buyers are saying the sellers never gave them the titles. Even worse, some say they can't even find the sellers. North Carolina DMV License and Theft Bureau investigators said recently they had five complaints in Charlotte in just one day. They are not sure why. Read more at wsoctv.com.

Virginia DMV Now Offers Online Crash Data Maps

You can now check traffic crash data for roads in your area thanks to a new map from the Virginia Department of Motor Vehicles. The interactive Crash Locations Map is available on the DMV's Highway Safety Office's website. Read more at wtkr.com.

REGION III NEWS

Surge In Driver's License Renewals Expected In 2018 (Indiana)

Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. Read more at heraldbulletin.com.

State Dealing With Glitches In New License Tab, Plate Computer System (Minnesota)

The statewide rollout this week of a new computer system intended to make renewing license plate tabs, issuing plates and processing vehicle titles more efficient has proved to be a bit challenging for some. Read more at m.startribune.com.

Missouri Moves Toward Real ID Compliance

Real ID is moving forward in Missouri, but residents won't see any changes anytime soon. In June, Gov. Eric Greitens signed legislation to bring the state in compliance with the federal law. The bill goes into effect Aug. 28 and will allow people a choice between a Real ID-compliant ID or keeping one that doesn't comply with the federal regulations. Read more at emissourian.com.

Ohio Leads Country With Portable Driver Simulators

Ohio is leading the country as the first state to begin piloting portable driver simulator systems (PDSS) as safety screeners and skill diagnostics prior to road tests. As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's' Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop a PDSS to assess driving skills of new drivers before they test for their permanent Ohio driver license. TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

MVA Launches Digital Driver's License Pilot Program (Maryland)
Maryland Department of Transportation Motor Vehicle Administration (MDOT MVA) officials announced last Friday that it will soon launch of a new digital driver's license pilot program. Read more at theeet.com.

New York Eyes 'Textalyzer' To Bust Drivers Using Phones
Police in New York state may soon have a high-tech way of catching texting drivers: a device known as a "textalyzer" that allows an officer to quickly check if a phone has been in use before a crash. Read more at 6abc.com.

Harsher Fines For State Law (Pennsylvania)
If you find yourself driving on the highway and spot an emergency vehicle on the shoulder, state law says you must move over to the next lane. It's part of the states "Move Over" or "Steer Clear" Law. Read more at wnep.com.

New Pennsylvania Driver's License Design Coming In Two Weeks
Pennsylvania's new driver's license design is on track to be available n about two weeks. The updated design offers enhanced security features for the state's driver license and identification card products. The Pennsylvania Department of Transportation has been working those improvements for two years. Read more at ncnewsonline.com.

Pennsylvania Gets Extension On REAL ID
The Department of Homeland Security (DHS) has notified the Pennsylvania Department of Transportation (PennDOT) that Pennsylvania has been granted a REAL ID enforcement extension through Oct. 10, 2017, which means that Pennsylvania residents will not face access issues when entering federal facilities through that date. Read mnore at shipnc.com.

New Sentencing Standards Coming For DUI Offenders (Pennsylvania)
New sentencing standardis for those convicted of driving under the influence are set to take effect next month. Under Act 33, signed into law by Governor Tom Wolf in 2016, first-time DUI offenders who blow a .10 or greater in a sobriety test will be required to install an ignition interlock in their vehicle instead of having their license suspended for one year. Read more at fox43.com.

Florida To Roll Out New Driver License, Identification Card Designs
Redesigned driver licenses and identification cards will soon make their way into residents' wallets, the Florida Department of Highway Safety and Motor Vehicles said. Efforts to revamp the credentials began in 2014 and included collaborations with stakeholders like law enforcement agencies and tax collectors, according to Alexis Bakofsky, deputy communications director for the department. Read more at orlandsentinel.com.

Georgia Might Ditch License Plate Tags; State Studies Idea
It is one of the most common experiences among car owners across the nation: Once a year, for a required fee, receive a decal to stick on your license plate or window showing your vehicle registration is up-to-date. But now Georgia is flirting with the idea of eliminating the stickers altogether, a potential massive decision given that the decals got stuck on more than 10.7 million vehicles in the last fiscal year alone. Read more at myajc.com.

Georgia Department of Driver Services (DDS) Begins Work On An App-Solutely Revolutionary Product For Its Customers
GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read the press release for more details.

DMV Investigators Seeing Spike In Car Sellers Not Giving Buyers Titles (North Carolina)
More car buyers are saying the sellers never gave them the titles. Even worse, some say they can't even find the sellers. North Carolina DMV License and Theft Bureau investigators said recently they had five complaints in Charlotte in just one day. They are not sure why. Read more at wsoctv.com.

Virginia DMV Now Offers Online Crash Data Maps
You can now check traffic crash data for roads in your area thanks to a new map from the Virginia Department of Motor Vehicles. The interactive Crash Locations Map is available on the DMV's Highway Safety Office's website. Read more at wtkr.com.

http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/RegionalNewsRIIINewsBannerNew.jpg
Surge In Driver's License Renewals Expected In 2018 (Indiana)
Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. Read more at heraldbulletin.com.

State Dealing With Glitches In New License Tab, Plate Computer System (Minnesota)
The statewide rollout this week of a new computer system intended to make renewing license plate tabs, issuing plates and processing vehicle titles more efficient has proved to be a bit challenging for some. Read more at m.startribune.com.

Missouri Moves Toward Real ID Compliance
Real ID is moving forward in Missouri, but residents won't see any changes anytime soon. In June, Gov. Eric Greitens signed legislation to bring the state in compliance with the federal law. The bill goes into effect Aug. 28 and will allow people a choice between a Real ID-compliant ID or keeping one that doesn't comply with the federal regulations. Read more at emissourian.com.

Ohio Leads Country With Portable Driver Simulators
Ohio is leading the country as the first state to begin piloting portable driver simulator systems (PDSS) as safety screeners and skill diagnostics prior to road tests. As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's' Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop a PDSS to assess driving skills of new drivers before they test for their permanent Ohio driver license. Read more at circlevilleherald.com

http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/RegionalNewsRIVNewsBannerNew.jpg
Arizona Specialty License Plate Sales Keep Helping Charities
Arizona Department of Transportation officials say specialty license plates keep raising record amounts of money for charitable causes. In the most recent fiscal year ending June 30, sales of the license plates generated more than $9.8 million for charitable causes and public programs. Read more at azfamily.com.

Undocumented Immigrant Driver's Licenses Near Milestone In California
Nearly a million undocumented drivers could be licensed in California by the end of the year. Through June 2017, the Department of Motor Vehicles has issued approximately 905,000 driver's licenses under Assembly Bill 60, the law requiring applicants to prove only their identity and California residency, rather than their legal presence in the state. Read the article at sacbee.com.

DMV Turns To Automation (Colorado)
Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. About 1.5 million credentials -- including licenses, identification cards and permits -- are set to expire in 2018. Read the article at greensburghdailynews.com.

Emails Tie DMV Computer Failures To $17 Million In Upgrades (Colorado)
Two years ago, state lawmakers allocated $93.3 million to the Governor's Office of Information Technology to upgrade computer systems at the Division of Motor Vehicles. The project was nicknamed DRIVES -- Driver License, Record, Identification and Vehicle Enterprise Solution. OIT records show it has spent more than $17 million from the DRIVES fund. But repeated computer-system meltdowns at DMV offices this year continue to cause long lines and delays for people trying to get driver's licenses. Read more at kdvr.com.

After Just 2 Days, There's Already A Petition To Change Washington's Distracted Driving Law
An online petition asking state lawmakers to change Washington's new distracted driving law had more than 18,000 signatures as of Tuesday afternoon. The law went into effect on Sunday and bans the use of handheld devices, including cellphones and tablets, while driving. The law also says police can give drivers a $99 ticket for other distracting behavior — such as eating, drinking or grooming — if the driver is pulled over for another offense. Read more at theolympian.com.
http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/OtherNewsBanner.jpg
Ford Reveals First-Ever F-150 Police Truck
Ford has revealed the first pickup truck specially designed for police use. The Ford F-150 Police Responder is based on Ford's FX4 off-road truck, but with a few additional features. Read more at wnep.com.

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk
The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. Read the press release for more details.

The Entangling Alliances Of The Self-Driving Car World, Visualized
"It's hard to keep track of who's working with who and what's going on," Lyft chief strategy officer Raj Kapoor told journalists last week, speaking about self-driving car partnerships. We agree. Read more at qz.com.

Australia To Introduce World Leading Border Clearance Technology
The Turnbull Government has entered into a contract with Vision-Box Australia Pty Ltd to deliver a world leading automated and 'contactless traveller' clearance process for people arriving in Australia by air. The three year contract, valued at $22.5 million, will deliver upgraded biometric technology, enabling the Department of Immigration and Border Protection to use biometric data to clear passengers arriving at Australian international airports. Read the Minister for Immigration and Border Protection press release for more details.

Explore How the Connected Vehicle Pilot Deployment Sites Are Transforming Transportation
The U.S. Department of Transportation (USDOT) connected vehicle pilot locations—New York City; Wyoming; and Tampa, Florida—have launched new websites and videos dedicated to their connected vehicle deployments. Read the press release for more details.

Driverless Car Bill Moves Quickly To House Floor
A driverless car bill is quickly moving through the House, as Congress races to pass the first federal legislation to address the emerging technology. Read more at thehill.com.

State Dealing With Glitches In New License Tab, Plate Computer System (Minnesota)

The statewide rollout this week of a new computer system intended to make renewing license plate tabs, issuing plates and processing vehicle titles more efficient has proved to be a bit challenging for some. Read more at m.startribune.com.

Missouri Moves Toward Real ID Compliance

Real ID is moving forward in Missouri, but residents won't see any changes anytime soon. In June, Gov. Eric Greitens signed legislation to bring the state in compliance with the federal law. The bill goes into effect Aug. 28 and will allow people a choice between a Real ID-compliant ID or keeping one that doesn't comply with the federal regulations. Read more at emissourian.com.

Ohio Leads Country With Portable Driver Simulators

Ohio is leading the country as the first state to begin piloting portable driver simulator systems (PDSS) as safety screeners and skill diagnostics prior to road tests. As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's' Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop a PDSS to assess driving skills of new drivers before they test for their permanent Ohio driver license. DMV Turns To Automation (Colorado)

Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. About 1.5 million credentials -- including licenses, identification cards and permits -- are set to expire in 2018. Read the article at greensburghdailynews.com.

Emails Tie DMV Computer Failures To $17 Million In Upgrades (Colorado)

Two years ago, state lawmakers allocated $93.3 million to the Governor's Office of Information Technology to upgrade computer systems at the Division of Motor Vehicles. The project was nicknamed DRIVES -- Driver License, Record, Identification and Vehicle Enterprise Solution. OIT records show it has spent more than $17 million from the DRIVES fund. But repeated computer-system meltdowns at DMV offices this year continue to cause long lines and delays for people trying to get driver's licenses. Read more at kdvr.com.

After Just 2 Days, There's Already A Petition To Change Washington's Distracted Driving Law

An online petition asking state lawmakers to change Washington's new distracted driving law had more than 18,000 signatures as of Tuesday afternoon. The law went into effect on Sunday and bans the use of handheld devices, including cellphones and tablets, while driving. The law also says police can give drivers a $99 ticket for other distracting behavior — such as eating, drinking or grooming — if the driver is pulled over for another offense. TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

Register Now And Save! 2017 Annual International Conference

The 2017 Annual International Conference is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the program-at-a-glance and register online today!

Session Highlight: Autonomous Vehicles Innovation

Tuesday, August 22

Speaker: Chris Urmson, CEO, Aurora Innovation
The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to deploy fully autonomous vehicles.

Visit the Annual International Conference Web site for more program details and to register online.

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

DMV Turns To Automation (Colorado)

Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. About 1.5 million credentials -- including licenses, identification cards and permits -- are set to expire in 2018. Read the article at greensburghdailynews.com.

Emails Tie DMV Computer Failures To $17 Million In Upgrades (Colorado)

Two years ago, state lawmakers allocated $93.3 million to the Governor's Office of Information Technology to upgrade computer systems at the Division of Motor Vehicles. The project was nicknamed DRIVES -- Driver License, Record, Identification and Vehicle Enterprise Solution. OIT records show it has spent more than $17 million from the DRIVES fund. But repeated computer-system meltdowns at DMV offices this year continue to cause long lines and delays for people trying to get driver's licenses. Read more at kdvr.com.

After Just 2 Days, There's Already A Petition To Change Washington's Distracted Driving Law

An online petition asking state lawmakers to change Washington's new distracted driving law had more than 18,000 signatures as of Tuesday afternoon. The law went into effect on Sunday and bans the use of handheld devices, including cellphones and tablets, while driving. The law also says police can give drivers a $99 ticket for other distracting behavior — such as eating, drinking or grooming — if the driver is pulled over for another offense. GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. Read the press release for more details.

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

Georgia Might Ditch License Plate Tags; State Studies Idea

It is one of the most common experiences among car owners across the nation: Once a year, for a required fee, receive a decal to stick on your license plate or window showing your vehicle registration is up-to-date. But now Georgia is flirting with the idea of eliminating the stickers altogether, a potential massive decision given that the decals got stuck on more than 10.7 million vehicles in the last fiscal year alone. TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

TRAFFIC INJURY RESEARCH FOUNDATION

THE ROLE OF DRIVER AGE IN FATALLY INJURED DRIVERS IN CANADA, 2000-2013

Traffic Injury Research Foundation, October 2016

Introduction

The role of driver age has been investigated in relation to many road safety issues. Studies show that, notably, younger drivers have been subject to considerable scrutiny due to their inexperience managing unexpected events on the road as well as risk-taking behaviour. Drivers aged 16-19 are over-represented in fatal crashes in terms of fatalities per population and number of licensed drivers (TIRF, 2013). Similarly, drivers aged 65 and older are over-represented in crashes, particularly drivers aged 80 and older, partly because they are more fragile (susceptible to injury) than younger drivers and less likely to survive a serious collision (Li et al. 2003). Drivers aged 65 and older are also more susceptible to age-related declines in reaction time and mobility, and can be affected by factors such as heart disease, visual impairment, stroke, dementia, and impairment due to prescription medication use (Vanlaar et al. 2008).

This fact sheet contains a review of the magnitude and trends of drivers, in four age groups, involved in fatal crashes in Canada using different indicators. These age groups include ages 16-19, 20-34, 35-64, and 65 and older.

This fact sheet, sponsored by State Farm®, summarizes the characteristics of fatally injured drivers according to age who were involved in collisions in Canada from 2000 to 2013. Data for this fact sheet are derived from TIRF's National Fatality Database which is jointly funded by the Public Health Agency of Canada and State Farm®. Fatality data from British Columbia from 2011 to 2013 were not available at the time that this fact sheet was prepared. As a result, Canadian data presented have been re-calculated to exclude this jurisdiction and make equitable comparisons.

Trends in fatal crashes by driver age groups

The number of fatally injured drivers by age group in Canada from 2000 to 2013 is shown in Figure 1. Fatally injured drivers aged 16-19 represented the smallest population group and this age group had the fewest fatally injured drivers throughout the 14-year period. In 2000, 134 drivers in this age group were fatally injured, rising to 140 in 2001 before decreasing to a low of 74 in 2013. Among drivers aged 20-34, there were 447 that were killed in 2000, peaking at 467 in 2006, before decreasing to a low of 321 in 2013. The age group that has consistently accounted for the most fatally injured drivers is the 35-64 year old group. There were 609 of these drivers in 2000, peaking at 656 in 2005, before decreasing to 457 in 2013. The second smallest age group in terms of both population and fatally injured drivers was the oldest age group, 65 and older. In 2000, there were 221 fatally injured

Register Now And Save! 2017 Annual International Conference
The 2017 Annual International Conference is coming up next month, August 21-23. Don't miss out on the Early Bird Registration Deadline of July 31. Why wait? Register today online and start planning your trip to the 2017 AAMVA Annual International Conference in San Francisco. Check out the program-at-a-glance and register online today!

Session Highlight: Autonomous Vehicles Innovation
http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/2017/07282017RN-chrisurmson-AIC2017.jpgTuesday, August 22
Speaker: Chris Urmson, CEO, Aurora Innovation
The former head of Google's Self-Driving Car project joins us to discuss autonomous vehicle technology. Attendees will hear how Chris has launched his own company to design and develop the right mix of sensors, software, and data services needed to deploy fully autonomous vehicles.

Visit the Annual International Conference Web site for more program details and to register online.

MVA Launches Digital Driver's License Pilot Program (Maryland)
Maryland Department of Transportation Motor Vehicle Administration (MDOT MVA) officials announced last Friday that it will soon launch of a new digital driver's license pilot program. Read more at theeet.com.

New York Eyes 'Textalyzer' To Bust Drivers Using Phones
Police in New York state may soon have a high-tech way of catching texting drivers: a device known as a "textalyzer" that allows an officer to quickly check if a phone has been in use before a crash. Read more at 6abc.com.

Harsher Fines For State Law (Pennsylvania)
If you find yourself driving on the highway and spot an emergency vehicle on the shoulder, state law says you must move over to the next lane. It's part of the states "Move Over" or "Steer Clear" Law. Read more at wnep.com.

New Pennsylvania Driver's License Design Coming In Two Weeks
Pennsylvania's new driver's license design is on track to be available n about two weeks. The

updated design offers enhanced security features for the state's driver license and identification card products. The Pennsylvania Department of Transportation has been working those improvements for two years. Read more at ncnewsonline.com.

Pennsylvania Gets Extension On REAL ID
The Department of Homeland Security (DHS) has notified the Pennsylvania Department of Transportation (PennDOT) that Pennsylvania has been granted a REAL ID enforcement extension through Oct. 10, 2017, which means that Pennsylvania residents will not face access issues when entering federal facilities through that date. Read mnore at shipnc.com.

New Sentencing Standards Coming For DUI Offenders (Pennsylvania)
New sentencing standardis for those convicted of driving under the influence are set to take effect next month. Under Act 33, signed into law by Governor Tom Wolf in 2016, first-time DUI offenders who blow a .10 or greater in a sobriety test will be required to install an ignition interlock in their vehicle instead of having their license suspended for one year. Read more at fox43.com.

http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/RegionalNewsRIINewsBannerNew.jpg
Florida To Roll Out New Driver License, Identification Card Designs
Redesigned driver licenses and identification cards will soon make their way into residents' wallets, the Florida Department of Highway Safety and Motor Vehicles said. Efforts to revamp the credentials began in 2014 and included collaborations with stakeholders like law enforcement agencies and tax collectors, according to Alexis Bakofsky, deputy communications director for the department. Read more at orlandsentinel.com.

Georgia Might Ditch License Plate Tags; State Studies Idea
It is one of the most common experiences among car owners across the nation: Once a year, for a required fee, receive a decal to stick on your license plate or window showing your vehicle registration is up-to-date. But now Georgia is flirting with the idea of eliminating the stickers altogether, a potential massive decision given that the decals got stuck on more than 10.7 million vehicles in the last fiscal year alone. Read more at myajc.com.

Georgia Department of Driver Services (DDS) Begins Work On An App-Solutely Revolutionary Product For Its Customers
GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read the press release for more details.

DMV Investigators Seeing Spike In Car Sellers Not Giving Buyers Titles (North Carolina)
More car buyers are saying the sellers never gave them the titles. Even worse, some say they can't even find the sellers. North Carolina DMV License and Theft Bureau investigators said recently they had five complaints in Charlotte in just one day. They are not sure why. Read more at wsoctv.com.

Virginia DMV Now Offers Online Crash Data Maps
You can now check traffic crash data for roads in your area thanks to a new map from the Virginia Department of Motor Vehicles. The interactive Crash Locations Map is available on the DMV's Highway Safety Office's website. Read more at wtkr.com.

http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/RegionalNewsRIIINewsBannerNew.jpg

Surge In Driver's License Renewals Expected In 2018 (Indiana)
Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. Read more at heraldbulletin.com.

State Dealing With Glitches In New License Tab, Plate Computer System (Minnesota)
The statewide rollout this week of a new computer system intended to make renewing license plate tabs, issuing plates and processing vehicle titles more efficient has proved to be a bit challenging for some. Read more at m.startribune.com.

Missouri Moves Toward Real ID Compliance
Real ID is moving forward in Missouri, but residents won't see any changes anytime soon. In June, Gov. Eric Greitens signed legislation to bring the state in compliance with the federal law. The bill goes into effect Aug. 28 and will allow people a choice between a Real ID-compliant ID or keeping one that doesn't comply with the federal regulations. Read more at emissourian.com.

Ohio Leads Country With Portable Driver Simulators
Ohio is leading the country as the first state to begin piloting portable driver simulator systems (PDSS) as safety screeners and skill diagnostics prior to road tests. As part of the Drive Toward a Safer Ohio initiative, the Ohio Department of Public Safety (ODPS) has partnered with the Children's' Hospital of Philadelphia (CHOP) and the Ohio State University (OSU) to develop a PDSS to assess driving skills of new drivers before they test for their permanent Ohio driver license. Read more at circlevilleherald.com

http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/RegionalNewsRIVNewsBannerNew.jpg
Arizona Specialty License Plate Sales Keep Helping Charities
Arizona Department of Transportation officials say specialty license plates keep raising record amounts of money for charitable causes. In the most recent fiscal year ending June 30, sales of the license plates generated more than $9.8 million for charitable causes and public programs. Read more at azfamily.com.

Undocumented Immigrant Driver's Licenses Near Milestone In California
Nearly a million undocumented drivers could be licensed in California by the end of the year. Through June 2017, the Department of Motor Vehicles has issued approximately 905,000 driver's licenses under Assembly Bill 60, the law requiring applicants to prove only their identity and California residency, rather than their legal presence in the state. Read the article at sacbee.com.

DMV Turns To Automation (Colorado)
Next year, nearly 1 million more Hoosiers than is typical are expected to seek renewals of their driver's licenses, and Indiana Bureau of Motor Vehicles officials are bracing for the increase. About 1.5 million credentials -- including licenses, identification cards and permits -- are set to expire in 2018. Read the article at greensburghdailynews.com.

Emails Tie DMV Computer Failures To $17 Million In Upgrades (Colorado)
Two years ago, state lawmakers allocated $93.3 million to the Governor's Office of Information Technology to upgrade computer systems at the Division of Motor Vehicles. The project was nicknamed DRIVES -- Driver License, Record, Identification and Vehicle Enterprise Solution. OIT records show it has spent more than $17 million from the DRIVES fund. But repeated computer-system meltdowns at DMV offices this year continue to cause long lines and delays for people trying to get driver's licenses. Read more at kdvr.com.

After Just 2 Days, There's Already A Petition To Change Washington's Distracted Driving Law
An online petition asking state lawmakers to change Washington's new distracted driving law had more than 18,000 signatures as of Tuesday afternoon. The law went into effect on Sunday and bans the use of handheld devices, including cellphones and tablets, while driving. The law also says police can give drivers a $99 ticket for other distracting behavior — such as eating, drinking or grooming — if the driver is pulled over for another offense. Read more at theolympian.com.
http://images.magnetmail.net/images/clients/AAMVA/RegionalNews/OtherNewsBanner.jpg
Ford Reveals First-Ever F-150 Police Truck
Ford has revealed the first pickup truck specially designed for police use. The Ford F-150 Police Responder is based on Ford's FX4 off-road truck, but with a few additional features. Read more at wnep.com.

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk
The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. Read the press release for more details.

The Entangling Alliances Of The Self-Driving Car World, Visualized
"It's hard to keep track of who's working with who and what's going on," Lyft chief strategy officer Raj Kapoor told journalists last week, speaking about self-driving car partnerships. We agree. Read more at qz.com.

Australia To Introduce World Leading Border Clearance Technology
The Turnbull Government has entered into a contract with Vision-Box Australia Pty Ltd to deliver a world leading automated and 'contactless traveller' clearance process for people arriving in Australia by air. The three year contract, valued at $22.5 million, will deliver upgraded biometric technology, enabling the Department of Immigration and Border Protection to use biometric data to clear passengers arriving at Australian international airports. Read the Minister for Immigration and Border Protection press release for more details.

Explore How the Connected Vehicle Pilot Deployment Sites Are Transforming Transportation
The U.S. Department of Transportation (USDOT) connected vehicle pilot locations—New York City; Wyoming; and Tampa, Florida—have launched new websites and videos dedicated to their connected vehicle deployments. Read the press release for more details.

Driverless Car Bill Moves Quickly To House Floor
A driverless car bill is quickly moving through the House, as Congress races to pass the first federal legislation to address the emerging technology. Read more at thehill.com.

Meeting Schedule/Agenda:

1. **Administration**
   a. **Call to order (C Nizer)**
   The meeting was called to order by Chrissy Nizer.

   b. **Roll call (C Taber-Lowry)**
   Roll call was performed by Cindy Taber-Lowry. Arin Diedrich attended the meeting on behalf of Jane Schrank.

   c. **Minutes of the previous meeting (C Taber-Lowry)**
   Cindy presented the minutes of the previous meeting (06/01/2017). The minutes were accepted without change.

2. **S2S Financial model (P Guiot)**
   Philippe Guiot presented the S2S Financial model, specifically focusing on FY17 and FY18. He asked members to recommend to the Board allocating FY17 and FY18 net surplus towards the S2S program income. Rick Holcomb made a motion recommending allocating FY17 and FY18 net surplus towards the S2S program income. Steve Leak seconded the motion, which was passed unanimously.

   Philippe also covered FY19 fees, specifically pointing out the per state and implementation fee increases. The cost model does include onboarding three more states in 2018 and four additional states per year after 2018. Due to the difficulty in projecting states implementing S2S, AAMVA and the GC have to rely on the information that we currently have; however, once the funding for onboarding state letters have been sent to non-participating S2S states AAMVA will be revisiting FY19 fees. Rick made a motion to adopt AAMVA's recommendation that FY19 fees be left as is. Scott Vien seconded the motion, which was passed unanimously. The proposed fee changes will now be presented to the Board in August with all fee changes published in September.

3. **Enhancements implementation plan (P Dsa)**
   Pam Dsa provided an update on the tasks that will be included in a Change Request to be submitted to Mississippi. The project cost estimates are over a three-year period. The AAMVA Executive Committee approved hiring three of the resources within this fiscal year to begin work on the Change Request prior to MS approval. It is expected that these three additional resources be on board by the end of September. AAMVA asked the GC to approve the usage of S2S reserves that are now set aside in AAMVA's portfolio as a backstop funding for those three additional positions in the off chance that the Mississippi contract is not awarded. Glenn Jackson made a motion to support this request. Marla seconded the motion, which was passed unanimously.

   The GC approved the project scope and schedule so that it can be submitted to Mississippi.

4. **S2S Working Group (WG) update (M Lechner)**
   Sri Prakash gave an overview of the current activities of the S2S WG for Melissa Lechner, who was not able to attend the meeting. Recent discussion topics and use case examples were presented as part of the WG update.

5. **State outreach update (C Taber-Lowry)**
   Cindy provided an update of S2S outreach activities. In an effort to update the S2S Recruitment Matrix she identified lead states for outreach opportunities as well as an update from those lead states who had volunteered to perform outreach activities in the past.

6. **Funding for onboarding process (P Guiot)**
   Philippe presented the funding for onboarding process that AAMVA would like to adopt for those states who have not implemented S2S. Implementation fee funding is available for the first nine states who successfully implement S2S. As a result of this, Philippe walked the GC members through various implementation scenarios using AAMVA's proposed process.

   Members discussed their REAL ID extension letters that were sent by Department of Homeland Security (DHS). During Region I and II Conference, DHS was not clear on what they will require the 36 remaining jurisdictions to have in place in order to be certified as REAL ID compliant states. Philippe explained to the members that AAMVA has had that discussion with DHS. At this time DHS is not expecting states to implement S2S all at once; however, they do want to see an active S2S implementation plan in place.

   Even though it is an increase in cost, members did suggest that when the funding for onboarding letters are emailed to the states that a hard copy of the letter also be mailed with a return receipt required.

   Philippe updated the members on the Territories situation. AAMVA is actively working on possible solutions that will allow the Territories to join S2S. However, before any solutions are implemented AAMVA will be updating DHS, the S2S Working Group, and the S2S Governance Committee for their feedback and/or approval.

7. **Data disclosure notification (C Taber-Lowry)**
   The Data disclosure notification presentation was provided by Cindy. She covered various state credential applications, WG feedback, existing best practices and additional proposed best practice recommendations. As part of the proposed best practice recommendations, members would like to include a statement that is clear and concise on the use of these best practices be dependent on state statutes and regulations. Marla made a motion that the existing best practices be updated to include the proposed verbiage. Steve seconded the motion, which was passed unanimously.

8. **Collecting statistics (Post-Pilot) (S Prakash)**
   This topic was not presented due to the interest of time.

9. **Proposed meeting agenda and meeting schedule (C Taber-Lowry)**
   Cindy discussed future S2S Governance Committee meeting topics and dates. She proposed rescheduling the December 21, 2017 meeting due to the holidays, which was agreed upon by all members.

10. **New business (C. Nizer)**
    With no new business brought up, Chrissy adjourned the meeting.

Notes, Decisions, Issues:

Action Items:

Action Item	*Assigned To*	*Due Date*
Present fee changes to the AAMVA Board of Directors' in August with all approved fee changes being published in September	AAMVA	Saturday, August 19, 2017
Send an email to lead states with their allocated CDLIS-only states' contact information as followed: • Montana – North Dakota • New Mexico -Indiana • Oregon – Indiana	Cindy Taber-Lowry	Tuesday, August 1, 2017
When the funding for onboarding letters are emailed to the states a hard copy of the letter should also be mailed with a return receipt required	AAMVA	TBD
Send an email to GC members when the letter explaining the funding for onboarding process is sent to all non-participating S2S jurisdictions	Cindy Taber-Lowry	TBD
Update existing best practices with the approved data disclosure notification verbiage	Cindy Taber-Lowry	TBD
Obtain the exact data disclosure notification verbiage Rick Holcomb (VA) wants to add to their temporary document	Cindy Taber-Lowry	Thursday, July 27, 2017
Create a doodle poll for members to vote on a new proposed date/time for the scheduled December 21, 2017 S2S Governance Committee meeting	Cindy Taber-Lowry	Friday, July 21, 2017

Next Meeting: **August 31, 2017 (3:00 to 4:30 PM EDT)**

Asma

We'll need to pick up testing again Monday morning. I anticipate having most if not all outstanding bugs resolved.

For planning purposes I will be involved in other activities on Wednesday next week, but otherwise expect to be available during our normal test window.

Have a good weekend!
Gary

Sure Gary,

Also, # K10 looks good.

The pending Test Case is # K5, where UD message was sent in error instead of H7.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Yes. We are not storing an accident if there is already one with the same state, date and locator reference. So for instance, the below two accidents are being considered the same although the comm vehicle indicator in this case is different.

AZ 20090909 2 1 2
A1200908877
AZ 20090909 2 9 2
A1200908877

Should all accident parameters be evaluated for uniqueness?

Gary,

Once the IM Message was sent, there were two matches found in AI and therefore 2 SC messages were sent to AI with the same Locator Header.

I tried the IM again and received the responses. Conviction/Withdrawal and Linkages counts looks good. Are you looking into why only 39 Accidents were posted on the history?

Also, wanted to check with you that there were no permits/permits restrictions on the records.

Can I send # K9?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

What I am seeing is that you are sending two inquiry requests, one for each of these two DLs. Hence, there are two sets of HC/H1 returned. One HC has the correct on-record counts for 7685503 and the 7685505 with zero counts.

The problem seems to be that both SC messages are being sent using the same alternate control key. Is this potential causing problems with the receipt of the responses on your end? See below where this scenario was run twice.

With that said, the counts on the first HC has 50 convictions and 50 withdrawals, but only 39 accidents. So apparently not all accidents were saved during the CSOR.

	ID	App	Type	Dest	M0	T0	Err	Locator

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look…

Thanks,
Asma

Asma, I have other obligations for the project today as well as fixes I need to make for this and other test cases. Can we pick this up tomorrow?

Hopefully we can then make progress on Driver I, K and L scenarios.

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,
Asma

This email comes from an external source, so remember, Think Before You Click!
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y') with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,

  or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,

  or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,

  or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),

  or

manually notify the SOR/Old SOR of the error.

Gary,

Can we repeat this test case?

Our UNI developers have requested to try this again so they can take a look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Asma,

Yes, did you want me to run test K2 again?

I have a fix for the H7 error if you would also like to try K5.

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAIAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,
Asma

From the uni log H4 looks consistent; but our internal data base log depicts a different alt control key value. I've attached a dump of the H4 message.

I see another pointer with DLN '7685503' from AI.

Can you please delete this and re-send the UD ?

Thanks,
Asma

Hi Asma,

Yes, did you want me to run test K2 again?

I have a fix for the H7 error if you would also like to try K5.

Gary,

Can we repeat this test case?

Our UNI developers have requested to try this again so they can take a look.

Thanks,
Asma

From the uni log H4 looks consistent; but our internal data base log depicts a different alt control key value. I've attached a dump of the H4 message.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

Can you please give me a few mints, I need to run for a meeting for 15 – 20 mints.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Asma,

Yes, did you want me to run test K2 again?

I have a fix for the H7 error if you would also like to try K5.

Gary,

Can we repeat this test case?

Our UNI developers have requested to try this again so they can take a look.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

Let's go with Driver J.

FYI, Driver D and Driver L will need to stay on the shelf until we complete the fixes.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

Gary,

We are looking into this.

Can you send the UC again, without the Old Full SSN (just send the UC with old Last 5 and Last 5 SSN).

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Wednesday, July 26, 2017 11:09 AM
To: Syeda, Asma <ASyeda@aamva.org>
Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

Gary,

Mark Unique is complete, I see NE going to AI:

ID	App	Type	Dest	M0	T0
1707311157490008	37	NE	AI	XX	P6
1707311157490006	2	NE	P6	XX	P6
1707311157490004	2	CD	P6	XX	P6
1707311157490001	2	UG	XX	P6	P6

Can I send # J6.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver M

Gary,

As pert the data set up of in the Test Plan, Driver M has a TSA Threat Determination of '1' which is missing on the 14/3 block.

H3 message has RRHGC ACD Code 'M21', but there is no Withdrawal .

As per the ACD Manual:

Table 14. Railroad-highway Grade Crossing Offenses

FMCSR	FMCSR Description	ACD Code	ACD Description
Railroad-highway Grade Crossing Offenses			
1st conviction = no less than 60 days 2nd conviction w/in 3 yrs = no less than 120 days 3rd conviction w/in 3 yrs = no less than 1 yr *NOTEs: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]* *Only applicable when offense occurred in a CMV* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 4 years from the conviction date or for as long as any resulting withdrawal is retained, whichever is longer.			
383.51(d)(1)	Not required to always stop, but fails to slow down and check that tracks are clear of an approaching train	M20	For drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing and check that tracks are clear of approaching train
383.51(d)(2)	Not required to always stop, but fails to stop before reaching the crossing, if the tracks are not clear	M21	For all drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing when the tracks are not clear
383.51(d)(3)	Always required to stop, but fails to stop before driving onto the crossing	M22	For drivers who are always required to stop, failure to stop as required before driving onto railroad-highway grade crossing
383.51(d)(4)	Fails to have sufficient space to drive completely through the crossing without stopping	M23	For all drivers, failing to have sufficient space to drive completely through the railroad-highway grade crossing without stopping
383.51(d)(5)	Fails to obey a traffic control device or the directions of an enforcement official at the crossing	M10	For all drivers, failure to obey a traffic control device or the directions of an enforcement official at a railroad-highway grade crossing
383.51(d)(6)	Fails to negotiate a crossing because of insufficient undercarriage clearance	M24	For all drivers, failing to negotiate a railroad-highway grade crossing because of insufficient undercarriage clearance

Can you please look.

Thanks,
Asma

Attachments: S2S-WG-Meeting-Minutes-071817.docx

Good evening all,
Thank you for your participation in the S2S WG meeting. Sorry for the delay.

- Attached please find the minutes from Tuesday's Working Group call.
- The purpose of this meeting is to provide states with an opportunity for sharing information and suggestions related to S2S, discuss technical issues, potential duplicate resolution process, etc. The agenda topics will be driven entirely by you, the States. Please consider additional topics that you would like to discuss, and if possible, send them to me prior to the next call.
- Please note that our next meeting is scheduled for **Tuesday, Aug 1st, at 1:00pm eastern**.

Refer to the sharepoint link for all materials related to S2S WG calls at

Meeting Notes

1. **Administration**
   a) Call to order (M. Lechner)
   b) Roll call (S. Prakash)
   c) Minutes of the previous meeting (S. Prakash)
      - Approved by the WG members.
      - Iowa: Use Case #3 presentation for CSOR on duplicates flagged records, Iowa agrees that there should be prevention of a CSOR

2. **Presentation for Data disclosure Notification (C. Lowry):**
   Presentations have been provided and will be placed at the Sharepoint site.

   <u>Data disclosure notification:</u>
   AAMVA surveyed some states that are participating in S2S on:

      - What the States application looks like

- If these applications have language included that informs the customer that PII information is collected to use for a S2S verification check
- Based on the check, the existing credential may or may not be cancelled in order to get a document issued by the State of Record
- Customer notification when a credential is surrendered or cancelled

Based on the survey and work group discussion on best practices, all participating states agreed to follow the below best practices:

- Update credential application verbiage explaining the following elements
  - Customer authorizing state administration to use their PII provided on application to perform a verification check, as required to determine eligibility
  - Customer agreeing to surrender any credential issued by another state
  - State of application will notify the other state that their credential is surrendered and cancelled and that the credential may not be used for operating privileges
  - Any false statements may result in the cancellation or revocation of customer's driver's license or learner's permit
  - Application will be cancelled if customer does not wish to surrender or cancel their out-of-state credential
  - Penalty of perjury statement
  - Customer signature and date

Best practices will be presented by AAMVA to the Governance Committee on Thursday, 20th July, 2017.

3. Roundtable (S Prakash)

a. Have participanting states had a chance to review and discuss Use Case#3 presentation for prevention on CSOR on duplicates flagged records?
   - Follow up discussion on next S2S WG meeting

4. Future meeting agenda and meeting schedule (S Prakash)

a. Next meeting date falls on August 1st conflicting with CDL round table meeting from 2:00-3:00pm.

All participating states agreed for next meeting to be held on August 1st 2017 from 1:00pm – 2:00pm

Action Items:

Action Item	*Assigned To*	*Due Date*	*Status*
Send email to S2S participants for review and feedback on "Best Practices Recommended"	**AAMVA**		**Open**

Next Meeting: **08/01/2017 1:00pm - 2:00pm EST**

Subject: Weekly SPEXS Baseline Structured Testing Status - Alaska - 7/31/2017

Alaska Team,

Please find below the SPEXS Baseline Structured Testing Status as of 07/31/2017:

Current project status – **Green**
Target Implementation Date: December 4th, 2017

AI status as of 07/31/2017

✓ Currently Testing – **First Pass**
- Test Start Date – 06/28/2017
- Driver Streams Completed Till Date – A, B, C, E, F, G, H, I, K
- Driver Streams In Progress - D, J, L, M
- % of total First Pass Test completed – 75%
- * Anticipated completion date for First Pass – 8/18/2016
  (Please note that this date is based on the progress we have seen thus far. It is very possible that the actual end date [based on how many, and what type of, issues we find in the reminder of the test] falls before or after this anticipated date*)

✓ Still to test:

- First Pass – In Progress
- End to End Pass – Yet to Start
- CD31 process – Yet to Start
- PDPS Baseline Structured Testing – Yet to Start
- Smoke Test (with 'AK' gap code) - Yet to Start

✓ Issues/Comments:

- None

Let me know if you have any questions.

Thanks,
Asma Syeda, PMI-ACP**,** CSM

This email comes from an external source, so remember, Think Before You Click!
Gary,

As pert the data set up of in the Test Plan, Driver M has a TSA Threat Determination of '1' which is missing on the 14/3 block.

H3 message has RRHGC ACD Code 'M21', but there is no Withdrawal .

As per the ACD Manual:

Table 14. Railroad-highway Grade Crossing Offenses

FMCSR	FMCSR Description	ACD Code	ACD Description
Railroad-highway Grade Crossing Offenses 1st conviction = no less than 60 days 2nd conviction w/in 3 yrs = no less than 120 days 3rd conviction w/in 3 yrs = no less than 1 yr *NOTEs: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]* *Only applicable when offense occurred in a CMV* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 4 years from the conviction date or for as long as any resulting withdrawal is retained, whichever is longer.			
383.51(d)(1)	Not required to always stop, but fails to slow down and check that tracks are clear of an approaching train	M20	For drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing and check that tracks are clear of approaching train
383.51(d)(2)	Not required to always stop, but fails to stop before reaching the crossing, if the tracks are not clear	M21	For all drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing when the tracks are not clear
383.51(d)(3)	Always required to stop, but fails to stop before driving onto the crossing	M22	For drivers who are always required to stop, failure to stop as required before driving onto railroad-highway grade crossing
383.51(d)(4)	Fails to have sufficient space to drive completely through the crossing without stopping	M23	For all drivers, failing to have sufficient space to drive completely through the railroad-highway grade crossing without stopping
383.51(d)(5)	Fails to obey a traffic control device or the directions of an enforcement official at the crossing	M10	For all drivers, failure to obey a traffic control device or the directions of an enforcement official at a railroad-highway grade crossing
383.51(d)(6)	Fails to negotiate a crossing because of insufficient undercarriage clearance	M24	For all drivers, failing to negotiate a railroad-highway grade crossing because of insufficient undercarriage clearance

Can you please look.

Thanks,
Asma

Subject: RE: Non Commercial Road Test?

Good afternoon Denise,

Here are Alaska's required maneuvers for non-commercial skills testing.

1. Starting and stopping
2. Parking parallel/3 point turn
3. Quick stop
4. Backing
5. Use of turn signals
6. Left and right turns
7. Proper lane change
8. Speed control
9. Following a vehicle
10. Traffic signs and signals
11. Intersection observance
12. General control of the vehicle

Sincerely,

Nichole Tham

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

Document ID: 0.7.1187.24210 DMV00047304

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24210 DMV00047305

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24210 DMV00047306

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24209 DMV00047312

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.102190 DMV00047317

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

Document ID: 0.7.1187.91490 DMV00047322

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.91490 DMV00047323

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.91490 DMV00047324

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.90348 DMV00047329

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.90348 DMV00047330

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

JURISDICTION NEWS

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24208 DMV00047335

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24207 DMV00047341

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24207 DMV00047342

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

JURISDICTION NEWS

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.98438 DMV00047353

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.98438 DMV00047354

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.98415 DMV00047359

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017)
Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.98415 DMV00047360

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

JURISDICTION NEWS

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24205 DMV00047371

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24205 DMV00047372

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24203 DMV00047377

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24203 DMV00047378

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.
http://images.magnetmail.net/images/clients/AAMVA/twir_root/TWIRSurveysbanner.jpg

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

Automated Vehicles Working Group Meets in Michigan

http://www.mmsend35.com/link.cfm?r=XVC4y8NbKxRnZ8KUEcD_dQ~~&pe=x4ENA_N5dv0uRFQOC_NvS3WO1zoN9FPfT_Y5Qwd2uyh3rY3mKjuxseiKZlySkWv5uYfEIFFmnmf_T7T_eEuQkA~~The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

http://www.mmsend35.com/link.cfm?r=XVC4y8NbKxRnZ8KUEcD_dQ~~&pe=JF8Wz2wNbheK_elwJvDHSueE0l1tyNAUBvTvfUC0kj8evz1p-zm8F2zVpEDmz5ktpo1xQplVq83nGFQe4xeV4w~~On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

http://www.mmsend35.com/link.cfm?r=XVC4y8NbKxRnZ8KUEcD_dQ~~&pe=6qDBNGqNZ0flLNymOgqPGSJaqfoaeLZ1NnC5elcNIC4iCkdKGFG3-AII1kscnE66x-mg3GFXGTap_HdDA_1gWQ~~The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data collection. The two major objectives are to (1) create a mechanism by which a

national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;

- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;
- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at the national, state and local levels to

prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

JURISDICTION NEWS

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.91326 DMV00047399

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017)
Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.91326 DMV00047400

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.45479 DMV00047405

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.45479 DMV00047406

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

OUR WEBINARS

Minnesota Becomes the First State to Implement NMVTIS Web Services

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort. For additional information, contact AAMVA Helpdesk at helpdesk@aamva.org.

System Modernization Best Practices Video Now on AAMVA.org

The video executive summary for AAMVA's newly-released System Modernization Best Practices is now available on the AAMVA website. System Modernization Best Practices provides a unique look into the inner workings of a motor vehicle administration system modernization project. If you're about to begin a system modernization project--or if you've already started one--we encourage you to use this document as a roadmap to help get you through your modernization journey. Visit the Best Practices and Model Legislation section of the AAMVA website to view the video and download the document!

Appointments to IDEC Board

The AAMVA International Driver Examiner Certification (IDEC) Executive Board, which was established to improve the efficiency and effectiveness of examining personnel, upgrade the professionalism of examiners and establish standards to assist jurisdictions in their examiner training programs is pleased to announce the following appointments to the IDEC Board. Ms. Holly Gallardo of New Jersey has been selected as the new Region I Representative and Mr. Steve Ayers of Virginia has been selected as the new Region II Representative. Please join us in congratulating Holly and Steve on their appointments to the IDEC Executive Board!

JURISDICTION NEWS

Five Mid-America States Win Top Honors in AASHTO Competition

State department of transportation projects that used high-tech tools like Bluetooth sensors to make work zones safer and that improved pedestrian access to heavily traveled corridors were winners in the mid-America regional America's Transportation Awards competition. Now in its 10th year, the competition attracted 22 project nominations from nine mid-America states. Five of those states received awards for nine projects during an awards luncheon held today at the Mid America Association of State Transportation Officials Annual Meeting in Cleveland. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce, the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. Winners are chosen by an independent panel of judges from within the transportation industry. Read more here.

Georgia DDS to Release Mobile App

GA Department of Driver Services (DDS) is excited to announce that it has partnered with Georgia-based Scope IT Consulting to develop a new Mobile App which will prove to be revolutionary in how DDS and its customers are able to communicate. Read more here.

FEDERAL NEWS

FMCSA Announces Demonstration Program to Conduct Crash Preventability Determinations

The Federal Motor Carrier Safety Administration (FMCSA) announces the initiation of a crash preventability demonstration program in which the Agency would accept requests for data review (RDRs) to evaluate the preventability of certain categories of crashes through its national data correction system known as DataQs. On July 12, 2016, FMCSA proposed a crash preventability demonstration program in a Federal Register notice and sought public comment. Based on the feedback received in response, the Agency has decided to launch a demonstration program. The *Federal Register* notice describes the crash types that will qualify for the demonstration program, the process for submitting RDRs to evaluate the preventability of a crash, how decisions on preventability will be displayed in Agency systems, and the data to be collected through this program for use in future decisions about a longer-term crash preventability program. The crash preventability demonstration program will begin accepting RDRs on August 1, 2017, for crashes that occur on or after June 1, 2017.

FMCSA Invites Comment On Medical Qualification Requirements ICR

The Federal Motor Carrier Safety Administration (FMCSA) announces that it is considering submitting an Information Collection Request (ICR) on the Medical Qualification Requirements, covered by OMB Control Number 2126-0006, which is currently due to expire on August 31, 2018, and invites public comment on a revision to the Information Collection (IC). This revision is due to the Agency's anticipation of a final rule to revise its regulations to eliminate the blanket prohibition against insulin-dependent diabetic individuals' operation of commercial motor vehicles (CMV) in interstate commerce. The final rule is based on the Agency's 2015 Notice of Proposed Rulemaking (NPRM) and subsequent announcement of the availability of recommendations provided by FMCSA's Medical Review Board (MRB) after an analysis of the comments received in response to the NPRM. Based on the MRB's analysis of the comments and their recommendations, FMCSA is considering replacing the previously proposed written notification from the treating clinician (TC) with a form titled Insulin-Treated Diabetes Mellitus Assessment Form to be completed by the TC and provided to the certified medical examiner (certified ME). This form could be required for CMV drivers treated with insulin for diabetes who wish to drive in interstate commerce. Comments must be received on or before September 25, 2017

FMCSA Seeks Comment On Extension Of A Currently Approved ICR On The Revocation of Authority Granted

The Federal Motor Carrier Safety Administration (FMCSA) requests approval to extend an information collection request (ICR) titled, "Request Extension for Revocation of Authority Granted." This information collection supports the DOT strategic goal of safety by enabling registrants to voluntarily request revocation of operating authority, or some part of that authority. A completed Form OCE-46 is filed with FMCSA by the registrant for requesting that all, or a part, of its operating authority be revoked. The information contained on the form is used by FMCSA in deciding on the revocation request. The use of Form OCE-46 has proven to be an easy and effective means by which a registrant can request revocation of its operating authority. No comments were received in response to the 60-day notice published in the Federal Register on March 22, 2017. Please submit comments by August 24, 2017.

FHWA Seeks Comments On Roadway Safety Data Capability Assessment ICR

The Federal Highway Administration (FHWA) seeks comments on an information collection request (ICR) on the Roadway Safety Data Capability Assessment. FHWA is initiating the large-scale effort to expand its relationships with the States to develop a better understanding of their data capabilities and conditions of data

OPEN RFPs

AAMVA RFP 16-074: DevOps Implementation in AAMVA Dev/QA Environment
Due: August 7, 2017

Open RFP's will be included in AAMVA's *Regional News* and *The Week In Review* newsletters to provide maximum exposure for jurisdictional procurements.

OUR SURVEYS

Please respond to these surveys from North Carolina, Indiana, Ontario, District of Columbia, Pennsylvania, and British Columbia.

Electronic Crash Reporting Requirements (Ends 08/23/2017) Responses received from MD, MI, NC, NM, PA.

Employee Learning & Development / Training Process (Ends 08/09/2017) Responses received from AR, ID, MD, MO, MS, NH, TX, UT, VT, WI.

Medical Review Survey (Ends 08/28/2017) Responses received from CA, ID, OH.

Electronic Lien Title (Ends 08/28/2017) Responses received from DC, ID, ND.

Document Management (Ends 08/10/2017) Responses received from AL, CA, GA, ID, MD, ME, MI, MS, ND, NH, NM, NY, TX, UT.

DMV's Providing Photos to Government Agencies (Ends 08/05/2017) Responses received from AB, CA, CO, GA, ID, KS, ME, MI, MO, MS, ND, NE, NH, NJ, NM, OR, TX, UT, VA, WI.

Supplying Vehicle Records to Research Entities (Ends 08/14/2017) Responses received from AL, CA, CO, ID, IL, KS, KY, ME, NC, ND, NE, NM, SC, UT, VA, VT.

Title Brand/Damage Disclosure Forms (Ends 08/11/2017) Responses received from AL, FL, IA, ID, IL, IN, KY, MD, ME, MN, MO, NC, ND, NE, NH, OH, OR, SC, TX, UT, VA.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Document ID: 0.7.1187.24201 DMV00047417

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24201 DMV00047418

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Automated Vehicles Working Group Meets in Michigan

The Automated Vehicles Working Group met in Ann Arbor, Michigan on July 26th and 27th to continue to prepare the *Jurisdictional Guidelines for the Safe Testing and Deployment of Highly Automated Vehicles,* a report that is expected to be published at the end of this year. This report will serve as a framework for jurisdictions to support the testing and deployment of highly automated vehicles in a consistent manner. James Fackler, Assistant Administrator, Customer Services Administration, Michigan Department of State and Vice-chair of the working group, served as host and arranged for the group to visit Mcity at the University of Michigan. Mcity is a model facility that will allow researchers to test emerging concepts in connected and automated vehicles in both off-road and on-road settings. The tour provided an opportunity for the working group members to continue to learn about the design, development and testing of highly automated vehicles. During the visit the group had the chance to ride in a NAVYA Shuttle, a Level 4 automated vehicle. They also held an informational meeting with a representative from UBER to discuss their automated vehicle plans. The group was joined by representatives from NHTSA and FMCSA. Bernard Soriano, Deputy Director, California DMV and Chair of the working group was pleased with the very productive meeting.

CDL Facial Recognition LEAN Workshop

On July 19th and 20th, the Midwest multi-state CDL facial recognition jurisdictions came together for a LEAN workshop to develop a streamlined process for coordinating facial recognition investigations in preparation for program implementation. LEAN is a method of developing a procedure with high value and less resources to provide the most efficient process possible. Participants from the states of South Dakota, Nebraska, Iowa, and Illinois worked with LEAN trainers at the Iowa State University (ISU) Center for Transportation Research and Education Facility in Ames, Iowa. During the two days the team worked to accomplish goals and objectives outlined in the project scope and created a flowchart to develop an effective process in which to communicate and coordinate facial recognition cases among jurisdictions. At the completion of the workshop, participants were provided a variety of resources to utilize as they plan to implement the multi-state facial recognition program later this year.

collection. The two major objectives are to (1) create a mechanism by which a national and State-specific gap analyses could be conducted to identify opportunities to improve capabilities and (2) provide tools and assistance to assist States in overcoming those gaps. The results will provide a detailed understanding (for FHWA and the States themselves) of the needs for complete, accurate roadway, crash, and traffic volume data for use in safety analysis. The assessment will yield both a quantitative understanding of each State's capability (using a capability maturity model) and State-specific action plans. The results will also be useful for States and FHWA in their efforts to develop programs and make improvements in roadway safety management. Please submit comments by August 28, 2017.

NHTSA Seeks Comment On ICR On State Law Enforcement Liaison Programs

The National Highway Traffic Safety Administration (NHTSA) seeks public comment on an information collection request (ICR) on the effectiveness of State Law Enforcement Liaison Programs. NHTSA proposes to collect information from the State's Law Enforcement Liaisons (LELs) and a selection of their State and sponsoring agency sponsors about the State's LEL program activities in promoting NHTSA's traffic safety programs and initiatives. Comments must be submitted on or before September 25, 2017.

NHTSA To Prepare EIS for 2022-2025 CAFE Standards

In accordance with the National Environmental Policy Act (NEPA), NHTSA intends to prepare an environmental impact statement (EIS) to analyze the potential environmental impacts of new Corporate Average Fuel Economy (CAFE) standards for model year (MY) 2022-2025 passenger automobiles (referred to herein as ``passenger cars'') and non-passenger automobiles (referred to herein as ``light trucks'') that NHTSA will be proposing pursuant to the Energy Policy and Conservation Act of 1975 (EPCA), as amended by the Energy Independence and Security Act of 2007 (EISA). This notice initiates the process for determining the scope of considerations to be addressed in the EIS and for identifying any significant environmental matters related to the proposed action. The scoping process will culminate in the preparation and issuance of a Draft EIS, which will be made available for public comment concurrently with the issuance of a Notice of Proposed Rulemaking (NPRM). To ensure that NHTSA has an opportunity to fully consider scoping comments, scoping comments should be received on or before August 25, 2017.

NTSB Aims to Reduce Speeding-Related Crashes

The National Transportation Safety Board released the results of its safety study on reducing speeding-related passenger vehicle crashes on the nation's roads. In the study, the NTSB recommends completion of all actions in the DOT 2014 Speed Management Program Plan, assessment of the effectiveness of point-to-point speed enforcement in the U.S., incentivizing passenger vehicle manufacturers and consumers to adopt intelligent speed adaptation systems, and increasing the adoption of speeding-related Model Minimum Uniform Crash Criteria Guideline data elements and improving consistency in law enforcement reporting of speeding-related crashes. Read more here.

President Trump Establishes The Presidential Advisory Council on Infrastructure

President Trump issued an executive order on July 19, 2017 establishing in the Department of Commerce the Presidential Advisory Council on Infrastructure (Council). The Council shall study the scope and effectiveness of, and make findings and recommendations to the President regarding, Federal Government funding, support, and delivery of infrastructure projects in several sectors. The Council shall make findings and recommendations concerning the following:

- prioritizing the Nation's infrastructure needs;
- accelerating pre-construction approval processes;
- developing funding and financing options capable of generating new infrastructure investment over the next 10 years;

Cell Phone Blockers & In-Vehicle Telematics (Ends 08/14/2017) Responses received from BC, DC, DE, FL, GA, ID, IL, KS, ME, MN, MT, NC, NE, NH, NM, OR, PA, SC, TX, VA, VT, WA.

If you need a Web password or have any questions about using the survey tool, please send an e-mail to webportalsupport@aamva.org or call Janice Dluzynski at 703-908-5842. All online surveys can be found on the AAMVA Web site here.

- identifying methods to increase public-private partnerships for infrastructure projects, including appropriate statutory or regulatory changes;
- identifying best practices in and opportunities to improve procurement methods, grant procedures, and infrastructure delivery systems;
- and promoting advanced manufacturing and infrastructure-related technological innovation.

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill

Senate Appropriations Subcommittee Approves Draft Transportation Spending Bill - The United States Senate Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Appropriations Subcommittee has approved a $60.1 billion draft FY 2018 transportation appropriations measure. The spending bill includes $19.47 billion in discretionary appropriations for the U.S. Department of Transportation – a $978 million increase above the FY2017 enacted level. The bill includes $550 million for TIGER Grants (also known as National Infrastructure Investments) – a $50 million increase above the FY 2017 enacted level. The legislation also includes $45 billion to be spend on the Federal-aid Highways Program consistent with the FAST Act and allows State Department of Transportation to repurpose old, unused earmarks for important infrastructure projects. The legislation includes $908.6 million in total budgetary resources for the National Highway Traffic Safety Administration (NHTSA) and $744.8 million for the Federal Motor Carrier Safety Administration (FMCSA). Of this amount, $68 million is to complete the modernization of border facilities to improve inspections along the Southern border.

U.S. House Energy and Commerce Committee Advances Self-Driving Vehicle Legislation

The House Energy and Commerce Committee has marked up and unanimously passed its self-driving vehicle legislation. This legislation, entitled the "Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act" or SELF DRIVE Act made some significant changes from its predecessor passed by the Committee's Digital Commerce and Consumer Protection Subcommittee. The legislation still contains preemption language of consequence, but in bipartisan negotiations, that language was narrowed from the broader preemption passed by the Subcommittee. The legislation requires that within 24 months of enactment, U.S. DOT will utilize the regulatory process to require the submission of safety assessment certifications regarding how safety is being addressed by autonomous vehicle manufacturers. The SELF DRIVE Act includes provisions requiring the public reporting of autonomous vehicle exemptions being granted by NHTSA to be included in a VIN-searchable database. The legislation also now includes state and local authorities as a part of an important Highly Automated Vehicle Advisory Committee that will make recommendations to the U.S DOT in areas addressing the safe testing and deployment of autonomous vehicles. The legislation has been favorably reported to the full House for consideration. AAMVA has detailed some policy considerations regarding the self-driving vehicle legislation through a previous legislative alert.

PARTNER NEWS

GHSA Applauds NTSB for Raising Profile of Speeding as Highway Safety Risk

The Governors Highway Safety Association (GHSA) thanks the National Transportation Safety Board (NTSB) for studying and evaluating approaches to reduce speeding-related traffic crashes and raising awareness of this critical safety issue. Speeding is a factor in approximately the same proportion of traffic fatalities as alcohol impairment (27% and 29%, respectively, in 2015), yet it is not subject to same social stigma as drunk driving and is often a forgotten highway safety problem despite its clear significance. This NTSB action should spur responses at

Document ID: 0.7.1187.24200 DMV00047424

the national, state and local levels to prioritize addressing excessive vehicle speeds along with other pressing traffic safety problems. National leaders must come together to develop best practices and programs to deter drivers from speeding and prevent the crashes, injuries and fatalities that too often result.

Monday, July 31st is Heatstroke Prevention Day

On average once every nine days an innocent young child tragically dies due to heatstroke in a vehicle. As part of National Child Vehicular Heatstroke Prevention Day on July 31, grieving parents are coming together and asking for immediate action on this pervasive, yet completely preventable problem. KidsAndCars.org and their safety partners will post facts and safety tips throughout the day about how child vehicular heatstroke can be prevented. They are calling on the public and media outlets to join in to support this national effort. Facebook, Twitter users and others can find photos, graphics and posts to share at http://www.kidsandcars.org/heatstroke-day.html.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver M

Hi Asma

The hazmat threat determination will require a data base change, schedule in the next few days, so driver M will need to be skipped. This data base release will also include the N restriction on permit C for Driver L.

Can we go back to driver J, test J8?

Gary,

As pert the data set up of in the Test Plan, Driver M has a TSA Threat Determination of '1' which is missing on the 14/3 block.

H3 message has RRHGC ACD Code 'M21', but there is no Withdrawal .

As per the ACD Manual:

Table 14. Railroad-highway Grade Crossing Offenses

FMCSR	FMCSR Description	ACD Code	ACD Description
Railroad-highway Grade Crossing Offenses 1st conviction = no less than 60 days 2nd conviction w/in 3 yrs = no less than 120 days 3rd conviction w/in 3 yrs = no less than 1 yr *NOTEs: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]* *Only applicable when offense occurred in a CMV* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 4 years from the conviction date or for as long as any resulting withdrawal is retained, whichever is longer.			
383.51(d)(1)	Not required to always stop, but fails to slow down and check that tracks are clear of an approaching train	M20	For drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing and check that tracks are clear of approaching train
383.51(d)(2)	Not required to always stop, but fails to stop before reaching the crossing, if the tracks are not clear	M21	For all drivers who are not required to always stop, failure to slow down at a railroad-highway grade crossing when the tracks are not clear
383.51(d)(3)	Always required to stop, but fails to stop before driving onto the crossing	M22	For drivers who are always required to stop, failure to stop as required before driving onto railroad-highway grade crossing
383.51(d)(4)	Fails to have sufficient space to drive completely through the crossing without stopping	M23	For all drivers, failing to have sufficient space to drive completely through the railroad-highway grade crossing without stopping
383.51(d)(5)	Fails to obey a traffic control device or the directions of an enforcement official at the crossing	M10	For all drivers, failure to obey a traffic control device or the directions of an enforcement official at a railroad-highway grade crossing
383.51(d)(6)	Fails to negotiate a crossing because of insufficient undercarriage clearance	M24	For all drivers, failing to negotiate a railroad-highway grade crossing because of insufficient undercarriage clearance

Can you please look.

Thanks,
Asma

This will require further investigation. When receiving an ROOSC, the pertinent out of state values are saved; however, I am unclear how they are populated when entering an OOS conviction per step J1.

We may need to move on to a new driver scenario…. M?

This will require further investigation. When receiving an ROOSC, the pertinent out of state values are saved; however, I am unclear how they are populated when entering an OOS conviction per step J1.

We may need to move on to a new driver scenario…. M?

Sent the inquiry and received the status response messages. However, I sent SSN as 188826666 since we have validation preventing the use of SSN values that start with '9'. Let me know if you anticipate this being a problem with these tests.

Subject: RE: AK - AMIE Online Re-write Meeting

Good morning Susan,

I wanted to give you a quick status update. Yesterday I was mostly regression testing, ensuring that the changes we've been making work as intended and haven't broken anything in the process. I'm working on tracking current title for the last transaction type, In-State Change Undo. I hope to have that done momentarily and then I'll proceed with testing.

Thank you,

I am so sorry, I got pulled for a production issue and I didn't realize the time as I wasn't at my computer for the reminder.

Again, I apologize!

Thanks,
Susan Creighton / 703.908.5893 office

I'm not sure. If it helps matters, we're still not currently testing. Nearly all of the anticipated changes have been made or are being finalized. Our plan is to be at least regression testing if not actually testing by Monday morning.

That's all I have and I don't have any additional questions.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver O

Thanks. Unfortunately this will require a fix. The code currently will send 'PERM' instead of 'INDEF' for an unspecified eligibility date.

Well, did you want to venture into Driver P territory? We are quickly approaching the point where every problem will require an immediate fix. Or would you rather I take the time to resolve the Driver J problem and potentially this issue with Driver O.

Sent the inquiry and received the status response messages. However, I sent SSN as 188826666 since we have validation preventing the use of SSN values that start with '9'. Let me know if you anticipate this being a problem with these tests.

This email comes from an external source, so remember, Think Before You Click!
Gary,

We can definitely start with Driver P.

So, if there are any issues, these can be fixed as part of the ongoing bug fixes.

Please let me know.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver O

Thanks. Unfortunately this will require a fix. The code currently will send 'PERM' instead of 'INDEF' for an unspecified eligibility date.

Well, did you want to venture into Driver P territory? We are quickly approaching the point where every problem will require an immediate fix. Or would you rather I take the time to resolve the Driver J problem and potentially this issue with Driver O.

Gary,

For Withdrawal ACD Code 'W28', the DL Withdrawal Eligibility date must be 'INDEF':

CD16.XCK.HW.1300	Driver License ACD Withdrawal Reason Code (DWDWRS) Drv Lic Withdrawal Eligibility Date (DWDWDE)	CLMF-CODE-WDRAW-REASON Format= Alpha-numeric Size=3 CLMF-DATE-WDRAW-ELIG Format= ccyymmdd Size=8	If Driver License ACD Withdrawal Reason Code (DWDWRS) value is 'W2' 'W28', then Drv Lic Withd Eligibility Code must be 'Indefinite'

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver O

Sent the inquiry and received the status response messages. However, I sent SSN as 188826666 since we have validation preventing the use of SSN values that start with '9'. Let me know if you anticipate this being a problem with these tests.

Subject: AK Event 12 Alert [NCS-ASH-PROD] (Primary Connection)

Alaska. Your connection to the NCS application has disconnected abnormally. This disconnection was not initiated by AAMVA and only affects your site. Please check your system logs (UNI and/or Network and Firewall) to identify what initiated this disconnection and reestablish your connectivity. Please provide AAMVA detailed information on the cause of this loss of connectivity.

AAMVA is also checking all dedicated resources. If it is determined that the cause of the problem is at any of AAMVA's dedicated resources we will let you know.

For UNI users, if you cannot determine the cause then please send the UNI IP log to UniHelpDesk@aamva.org.

UNI IP Log for CICS is the TCPM (TCPDATA) CICS System log.
UNI IP Log for IMS is the UNI Error Log.
UNI IP Log for Windows today's status log (UNI40\Data\Log).
UNI IP Log for UNIX is the UNISES files in $UNI_DATA/uni/UNISES*

Gary,

We need to make a change at our end for AI to receive 15 H* responses.

Our development team is looking into it right now, this might take some time.

Will let you know once done.

Thanks,
Asma
